

FOR IMMEDIATE RELEASE

Climavision Honored by Goldman Sachs for Entrepreneurship

CEO Chris Goode Among the Most Exceptional Entrepreneurs at 2023 Builders and Innovators Summit

Louisville, KY – October 18, 2023 – Today, Goldman Sachs (NYSE:GS) is recognizing Climavision CEO Chris Goode as one of the Most Exceptional Entrepreneurs of 2023 at its Builders and Innovators Summit in Healdsburg, California.

Goldman Sachs selected Goode from multiple industries to be honored at the two-day event. Goode co-founded Climavision in 2021 to dramatically improve weather forecasting around the United States. Climavision is developing a weather services and intelligence platform powered by a private network of high-resolution radars, GPS-RO data, and proprietary software, to vastly improve the timing and accuracy of weather forecasting, and to fill low-level data voids in existing weather surveillance.

Climavision will install its 20th radar this month and is already at work addressing other low-level gaps around the country, planning to have 30 radars operational by the end of the year and eventually scaling the network to more than 200 radar systems.

“I am deeply honored to receive this designation from Goldman Sachs, and it is humbling to be on a list with some of the most innovative entrepreneurs and business leaders in the world,” said Goode. “It underscores the importance of what Climavision is doing to address an increasingly volatile climate. We are striving to make the world a better place, and people are noticing.”

“We’re delighted to recognize Chris Goode as one of the most exceptional entrepreneurs of 2023,” said David Solomon, Chairman and CEO of Goldman Sachs. “Like everyone in this year’s class, Chris has been a visionary in their field, pushing forward innovation and redefining markets. We are excited to harness Goldman’s convening power to bring together these dynamic leaders and hear their insights.”

In addition to honoring the most exceptional entrepreneurs, the Summit consists of general sessions and clinics led by seasoned entrepreneurs, academics, and business leaders as well as resident scholars.

About Climavision

Climavision brings together the power of a proprietary, high-resolution weather radar and satellite network combined with advanced weather prediction modelling and decades of industry expertise to reduce existing coverage gaps and drastically improve forecast ability. Climavision's revolutionary new approach to climate technology weather solutions is poised to help reduce the economic risks of climate change on companies, governments, and societies alike. Climavision is backed by The Rise Fund, the world's largest global impact platform committed to achieving measurable, positive social and environmental outcomes alongside competitive financial returns. The company is headquartered in Louisville, KY, with research and development operations in Raleigh, NC. To learn more, visit www.Climavision.com
